Use Javascript for doing client side validation for shopping cart web application.

Login.html using javascript

```
<html>
<head>
  <title >Login - Online Books Store</ title>
  <script type="text/javascript">
    function validateLogin()
    {
      var uname = document.f2.username.value;
      if (uname.length <= 0)
      {  alert ("Please enter username");
         document.f2.username.focus();
         return false;
      }
      if (uname.length < 8)
      {  alert ("Username should not be less than 8
                characters");
         document.f2.username.focus();
         return false;
      }
      var pwd = document.f2.password.value;
      if (pwd.length <= 0)
      {  alert ("Please enter password");
         document.f2.password.focus();
         return false;
      }
      if (pwd.length < 6)
      {  alert ("Please enter password not less than
                6");
         document.f2.password.focus();
```

2026/2/23 16:28

```
        return false;
    }
    alert("Login successful");
    return true;
  }
  </script>
</head>
