XML Validator - XSD (XML Schema)

Validators / XML Validator - XSD (XML Schema)

Validates the XML string/file against the specified XSD string/file. XSD files are "XML Schemas" that describe the structure of a XML document. The validator checks for well formedness first, meaning that your XML file must be parsable using a DOM/SAX parser, and only then does it validate your XML against the XML Schema. The validator will report fatal errors, non-fatal errors and warnings.

The XML document is valid.

Option 1: Copy-paste your XML document here

```
<?xml version="1.0"?>

<bookstore xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance"
xsi:noNamespaceSchemaLocation="bookstore.xsd">
```

Option 2: Or upload your XML file

Choose File | No file chosen

File encoding: UTF-8

Option 1: Copy-paste your XSD here (Optional if XSD referred in XML using schemaLocation)

```
<?xml version="1.0" encoding="UTF-8"?>

<xs:schema xmlns:xs="http://www.w3.org/2001/XMLSchema">

<xs:element name="bookstore">
```

Option 2: Or upload your XSD document

Choose File | No file chosen

File encoding: UTF-8

Validate XML

XML Validator - XSD (XML Schema)

Validators / XML Validator - XSD (XML Schema)

Validates the XML string/file against the specified XSD string/file. XSD files are "XML Schemas" that describe the structure of a XML document. The validator checks for well formedness first, meaning that your XML file must be parsable using a DOM/SAX parser, and only then does it validate your XML against the XML Schema. The validator will report fatal errors, non-fatal errors and warnings.

- Cvc-datatype-valid.1.2.1: 'WRONG VALUE WRITTEN HERE' Is Not A Valid Value For 'decimal'., Line '7', Column '40'.
- Cvc-type.3.1.3: The Value 'WRONG VALUE WRITTEN HERE' Of Element 'price' Is Not Valid., Line '7', Column '40'.

Option 1: Copy-paste your XML document here

```
<title>Java Programming</title>
<author>James Gosling</author>
<price>WRONG VALUE WRITTEN HERE</price>
</book>
```

Option 2: Or upload your XML file

Choose File | No file chosen

File encoding: UTF-8

Option 1: Copy-paste your XSD here (Optional if XSD referred in XML using schemaLocation)

```
<?xml version="1.0" encoding="UTF-8"?>

<xs:schema xmlns:xs="http://www.w3.org/2001/XMLSchema">

<xs:element name="bookstore">
```
