

Mid 1 Node JS lab internal

(1)

Build a web page, mimicking a typical Login page, covering minimum elements like text box for user name, password box, button for Sign In, have a link to Create a New Account page.

Use Internal CSS for styling.

Use Internal JS for **validating** that some input is provided in the input boxes. Otherwise, show an alert or error underneath that input box in red color.

(2)

Build a webpage mimicking a typical registration form , consisting of username, password, email, contact no, gender and address.

Use External CSS for styling

Use JS for **validating** the fields and display either Registration is successful or else display an alert box.

(3)

Build an college website pages consisting of home page [about college, events , news using grid format] and student Registration page. Use logo, header and footer section in the design

Use External CSS for styling.

Use External JS for **validating** username and password.[Username -format @ domain name. Password-Min 8 characters, 1 upper case character, 1 special symbol] otherwise show an alert box and change the textbox bground color to red.

(4)

Build a online super market homepage and Cart web page, showing a catalogue of products, using either CSS grid layout or Bootstrap framework. Have some store name at the top of the web page & some copy right information at the bottom of the web page. In between, show various Products with cost and add item button and display the cart page for selected items and total cost.

(5)

Build a web page, mimicking a typical Catalog page, which consists of the products with description in detail. Use grid formats to arrange the products.

Use Internal CSS for styling.

Given an example XML for a bookstore[consisting of atleast 5 books details] along with relevant DTD and **validate** it.
